Full-stack .NET and Angular developer with 3+ years building retail POS and back-office systems on Azure at EG India. Migrates legacy solutions to .NET 10 and extends Claude Code with custom skills, agents, and MCP servers.

SKILLS

Languages: C#, TypeScript, JavaScript, SQL, KQL, Kotlin*, Python*
Backend: .NET, ASP.NET Core Web API, Microservices, WCF, Entity Framework, REST, SOAP, WPF, Blazor*
Frontend: Angular, HTML5, CSS3, Bootstrap, MudBlazor*, React*
Cloud and DevOps: Azure (App Service, Service Bus, Cosmos DB, App Insights), Azure DevOps, GitHub Actions, Git
Databases: SQL Server, Azure SQL, Cosmos DB, MySQL
AI and Tools: Claude Code (custom skills, agents, hooks), MCP servers, multi-agent orchestration, LLM APIs, Postman, Jira
** basic working knowledge*

EXPERIENCE

Junior Software Developer, EG India – Mangaluru, Karnataka Apr 2023 – Present

- Developed full-stack features for retail point-of-sale (POS) and back-office applications used by retail chains, building .NET Web APIs, Angular screens, and integrations with legacy WCF and SOAP services
- Maintained .NET microservices on Azure App Service that exchange events over Azure Service Bus and persist data in Cosmos DB, SQL Server, and Blob Storage
- Upgraded LIP (Integration Platform) packages from v3 to v4, converting projects, migrating configuration and settings, refactoring jobs, and updating Azure DevOps pipelines
- Migrated solutions to .NET 10 from .NET Framework 4.8, .NET 6, .NET 8, and .NET Standard 2.0, aligning NuGet packages and fixing analyzer warnings
- Analysed production incidents from Jira tickets using Application Insights, Log Analytics (KQL), and POS transaction logs, tracing root causes across the API, desktop POS, and integration jobs
- Resolved production defects in gift card and loyalty cloud services, including time zone handling and SQL index tuning
- Built 11 custom Claude Code skills and 2 agents for team workflows (Jira change requests, Zephyr test cases, .NET and LIP upgrades, POSLog decoding, code review), wired to Jira, Confluence, and Zephyr MCP servers
- Configured Claude Code hooks that compress large tool outputs and guard oversized reads to reduce token usage

Technologies: *C#, .NET, ASP.NET Core, WCF, Angular, SQL Server, Cosmos DB, Azure Service Bus, App Service, Azure DevOps, Git*

Freelance Web and Android Developer, Self-employed – Udupi, Karnataka 2020 – 2022

- Delivered responsive websites and Android apps for small-business clients using WordPress, PHP, MySQL, and Java

PROJECTS

GenKeyboard – AI writing keyboard for Android (open source, Apache-2.0) github.com/prabhath112/GenKeyboard

- Forked FlorisBoard and added 9 AI writing actions (grammar, tone, paraphrase, translate, summarize) usable in any app
- Built a Cloudflare Worker backend that routes Gemini and OpenRouter calls and enforces per-device quotas

Azure Insights Dashboard – Internal observability tool, EG India 2025

- Built a Blazor Server dashboard (MudBlazor, ApexCharts) that runs KQL queries against Application Insights for 34 retail tenants, with exception clustering and cross-tenant anomaly detection
- Added an integrated POS API test runner that runs dotnet and Playwright suites against Azure test slots
- Packaged the telemetry queries as an MCP server library so Claude Code can query the same data, and deployed on IIS

Oracle – Personal multi-agent AI assistant (in progress)

- Designed a multi-agent orchestration layer where a planner agent delegates to specialized tool-calling agents

EDUCATION

B.E. in Computer Science and Engineering, CGPA 7.10 / 10 Aug 2022
Shri Madhwa Vadiraja Institute of Technology and Management (VTU), Udupi | Angular Certification, Internshala 2024
